

## Goat Parchment Furniture

This marvelous pebbly grained material presumes the high qualified artistic and artisanal skills provided by Cesare Ferrari's handicraftsmen.

Parchment can be used as an applied material for cabinet doors, desks, tabletops, headboards, wall panels and wardrobes. Versatility is a defining feature of goat parchment, with both clean and consistent textures or characterized, scarred, and uniquely-patterned skins readily available. Colors ranging from off- white and cream to heavily patterned and even dyed make goatparchment perfect for everything from large interior projects to individual pieces of collectible design.
